Eriez' DSP Single Surface Metal Detectors Find Contaminants in Wide Web Applications

Eriez® E-Z Tec® DSP Single Surface Metal Detectors are designed for single surface detection of metal contaminants for web applications.

[Eriez Single Surface Metal Detectors](#) have a unique flat-surfaced detection area that is positioned beneath the belt or web. The detection surface accommodates a wide variety of applications, including sheet plastics, wood, rubber, woven materials and particle board.

With Eriez' Single Surface Narrow Profile Metal Detector, installation is simple with minimal modification.

The remote control is in a NEMA 4X enclosure and includes a touch screen interface, allowing the operator to easily move through the available menus.

Some of the features provided with the control are auto product set-up, multi-languages, calibration verification and consolidated electronics.

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, plastics, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through ten international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send e-mail to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
